

GE Sensing & Inspection Technologies

Make your job easier
with the DPI 620 HART®
Calibrator/Communicator.

Our hand-held DPI 620 advanced multifunction calibrator now incorporates full HART® capability, making it the most compact combined HART calibrator and communicator on the market. You can considerably reduce the inventory of equipment you have to carry to perform maintenance and calibration tasks because now there is a calibrator that's also a communicator.

DPI 620 features:

- Robust, weatherproof and extremely compact
- Color interface
- Complete Device Description (DD) Library to support more than 1,000 devices
- 24V loop power supply
- Built-in 250 ohm loop resistor
- Measures mA without a multimeter
- Simultaneously measures/sources Primary Variable without other secondary calibration equipment

Visit www.DPI620.com for more information.

DPI 620 Advanced Modular Calibration System

Pressure measurement and generation
in one compact device.

- Pressure accuracy from 0.025%
- Interchangeable pressure modules from 10 inH2O to 15,000 psi
- Pressure generation from vacuum to 1,500 psi pneumatic or 0 to 15,000 psi hydraulic
- Quick-fit connections with no need for tools
- Overpressure protection
