

How can I upgrade my installed radar base?

Is my radar compatible?

FMP5x, FMR5x or FMR6x with HART 7 latest revision

HART 7 FW 01.03.zz or higher
Device revision 04

HART 7 FW 01.02.zz or higher
Device revision 03

HART 7 FW 01.00.zz or higher
Device revision 01

Is my local radio approval available?

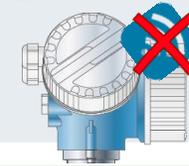

Ask your local Endress+Hauser sales center or representative.

Is the Ex approval for the radar updated with Bluetooth?

Check the latest radar safety instruction (XA) for the Bluetooth option

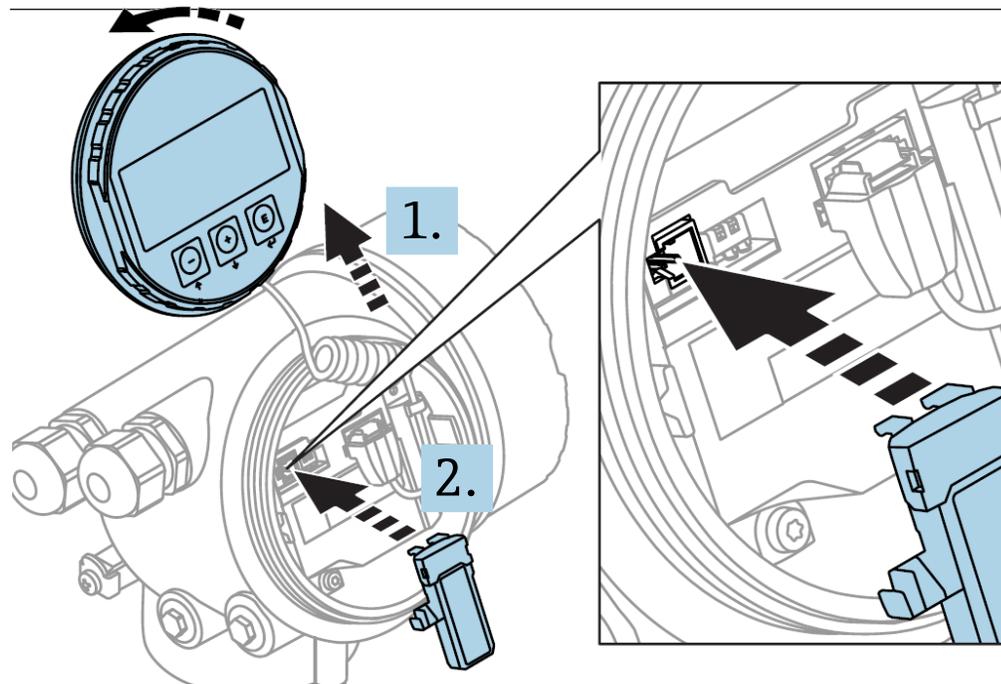

Has my radar a housing with glass window?

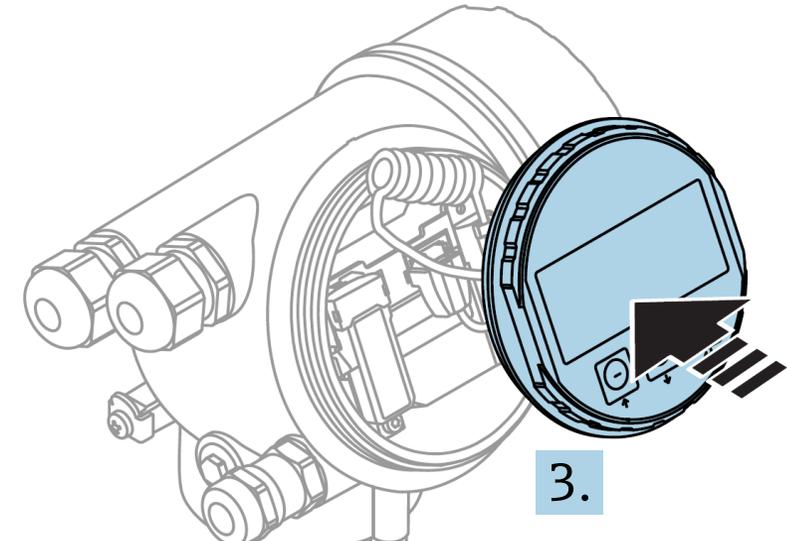

All checks done?

Order **71377355 Bluetooth Module (BT10)** and install it in the radar and connect with the latest version of the SmartBlue App

Installing the Bluetooth module*

1. Open housing and remove the display
2. Slide in the Bluetooth module in the CDI slot

3. Place the display in the upright position. With the Bluetooth module the rotation of the display is not possible.

*Only necessary when upgrading installed base
