

pH CONTROLLER WITH ALARM

A first-of-kind pH controller that tells you *when pH is out of range!* Perfect for waste treatment where upsets are time sensitive. Not just an “output” that needs considerable wiring work to actually produce a useful alarm, but ready out-of-the-box. Complete with status LED stack light that indicates in or out of range, or when the pumps are active.

Separate control points for the high pH control pump, the low pH control pump, high alarm and low alarm.

Features:

- Easy to set up, operate and calibrate.
- Convenient front button silences the buzzer.
- Buzzer snooze alarm sounds again in 30 minutes if pH not correct.
- Convenient buttons to force pumps on. (useful for pump calibration, priming, drum emptying)
- Rugged industrial pH probe included.
- Waterproof. Suitable for wash down duty.
- 4-20mA output included.
- RS485 output included.
- Simple instructions by print, video, or phone - no need to slog through complicated module instructions.
- Optional remote notifications by email or text.

MODEL pH-1
