

MadgeTech Cloud Services

Access Data Instantly and Securely
from Anywhere in the World

Instantly Access Your Data from Anywhere

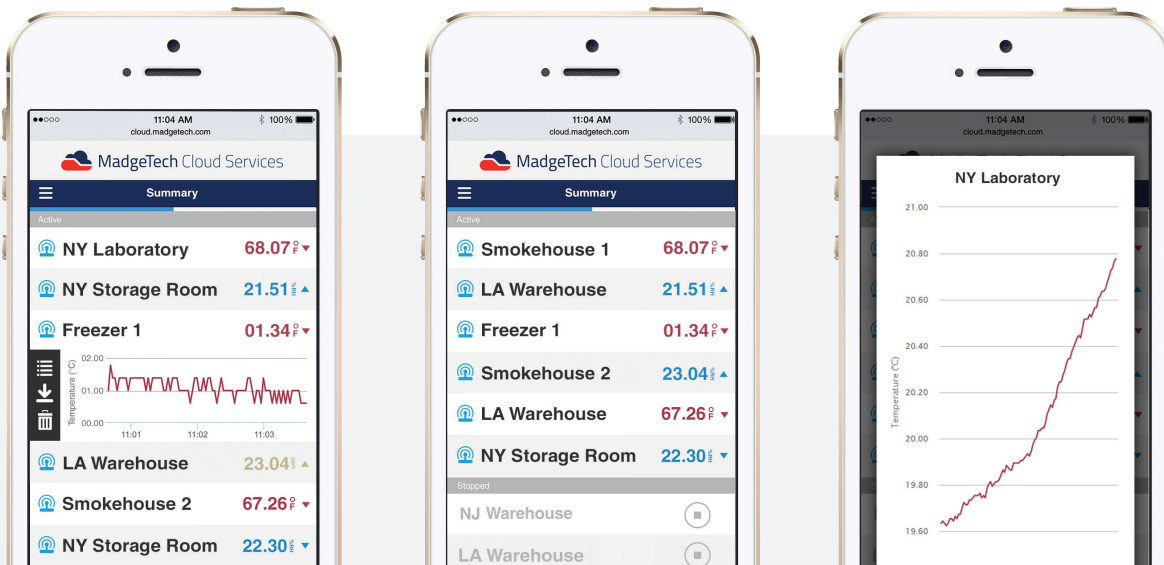

The MadgeTech Cloud Services data logging platform provides continuous monitoring of temperature, pressure, humidity data and more, while giving users instant access from any location. With MadgeTech Cloud Services, data loggers can securely transmit data in real-time to be viewed on any internet enabled device such as a computer, tablet or cell phone.

Scalable Solution with Limitless Applications

MadgeTech Cloud Services is dynamically designed to provide a simple, affordable solution for applications of all sizes. From a single data logger to networks of hundreds of loggers in multiple locations. The MadgeTech Cloud platform provides facilities on-demand data supervision offering peace of mind and flexibility like never before.

Data Security & Compliance Needs

Recorded data is transmitted to the cloud and can be accessed securely and reviewed from any internet location around the world. For more demanding security needs due to regulatory concerns, custom packages are available with enhanced features and on-site hosting options to contain data access within a facility, campus or intranet as desired.

RFC1000 Cloud Relay

MadgeTech Cloud Services Data Logging Hub

Taking cloud data logging to a whole new level! The RFC1000 Cloud Relay is a data logging hub that connects to the internet via Ethernet and transmits data directly to the MadgeTech Cloud Services platform. This allows users to remotely monitor and manage groups of data loggers throughout a large facility or multiple locations without the need of a central PC.

- » Transmit Data Directly to MadgeTech Cloud Services
- » Virtually Limitless Scalability
- » Long Distance Wireless Transmission
- » LED Indicators

Email & Text Message Alerts

The MadgeTech Cloud platform works seamlessly with the MadgeTech 4 Data Logger Software to allow user configurable alarms as needed. When an alarm is triggered, users can receive immediate notifications via text message or email and have instant access to review the situation within seconds. Notifications are also available on screen as well as audible and visual alerts directly on the device.

For RFC1000 Cloud Relay users, using the MadgeTech 4 Data Logger Software is optional and alarms can be configured directly within the MadgeTech Cloud Services interface on any smartphone or tablet.
