

PRE-PAID START-UP & COMMISSIONING SERVICE

Get optimal reliability and integrity from the very start

PEAK PERFORMANCE FROM THE START

Use Emerson's Pre-Paid Start-Up & Commissioning Service to validate installation and ensure proper configuration and commissioning.

Entrust the work to Emerson service engineers who are factory trained and certified on Rosemount products. We can also train your staff to keep your products operating at peak performance for years.

Run right. On time, every time.

Getting a facility, or a process, up and running under a tight timeline has never been easy. And, as you integrate complex technologies the task becomes even more demanding. Your staff may not have the specialized skillsets—much less the time—to meet all the requirements and stay on schedule.

Check off one challenge. The support you need to properly start-up and commission Rosemount® products is readily available from Emerson's Lifecycle Services for Rosemount products. Local Emerson™ service engineers will complete the work on time, every time. Globally, all service engineers follow documented standard operating procedure protocols to ensure consistent service outcomes: accurate and reliable process measurement products in any application, in any process, in any plant—every time.

Maximize and protect your Rosemount products

Lifecycle Services offer the Start-up & Commissioning Service tailored to specific Rosemount products. Standardized procedures ensure you always receive support in the same manner, using the same methods. You will have Emerson's best practices working on your behalf to give you the best possible performance starting on day one, to provide lasting process integrity.

+ STRAIGHT FROM THE CUSTOMER

"When weighted against what was gained from this project, the total project cost, including installation services and customized user interface software, seemed quite reasonable given the project's payback."

– **Michael Fischback**,
Facilities Engineer, PHP

+ Ensure the highest quality

- Validate proper mechanical and electrical installation of Rosemount products
- Configure products to operating parameters
- Commission measurement products and verify performance under process conditions
- All Emerson service engineers are factory trained and certified on Rosemount products

+ Start-up on schedule

- Schedule onsite work during the business week, or over the weekend, to fit your tight project timeframes

+ Improve staff skill set

- Emerson service engineers will provide an onsite overview of essential installation, operation, and troubleshooting best practices to help diagnose and resolve common product and network issues

+ Receive a one-year follow-up

- A local Emerson Service Center representative will contact you to assess product and network performance

Contact Emerson today to learn how we can optimize your Rosemount products to unleash their full potential for your processes.
