

# testo 6381

## Differential pressure transmitter with humidity & temperature option

### SPECIFICATIONS

testo 6381

The testo 6381 differential pressure transmitter was developed specially for monitoring differential pressure in the measuring range from 10 Pa to 1000 hPa. In cleanroom technology, the maintenance of positive pressure prevents the entry of contaminated air. In order to keep the cleanroom conditions constant, the transmitter additionally calculates the parameters volume flow and flow velocity from the measured differential pressure. Thanks to an optional probe from the probe series 6610, the additional recording of humidity and temperature with one instrument is also possible.

The testo 6381 is particularly outstanding thanks to the automatic zero-point adjustment which ensures high accuracy and long-term stability.

The integrated self-monitoring and early warning function also ensures the operator maximum uptime.

#### Typical applications:

- Differential pressure monitoring between cleanrooms; optional: simultaneous measurement of ambient temperature and humidity
- Monitoring drying processes
- Differential pressure measurement in filling processes and spray-painting systems

### SPECIFICATIONS

testo 6381

- Measurement of differential pressure, flow velocity, volume flow; optional: humidity and temperature
- Automatic zero-point adjustment guarantees high, temperature-independent accuracy and long-term stability
- Low measurement range down to 10 Pa ensures very high precision at lowest pressures
- The robust metal housing protects against tough ambient conditions
- Display with multi-language operating menu and optical alarm display
- Ethernet, relay and analog outputs allow optimum integration into individual automation systems
- Self-monitoring of the transmitter and early warning function ensure maximum uptime
- P2A software for programming, adjustment and analysis saves time and costs in commissioning and maintenance
- Scalability of  $\pm 50$  percent of the measuring range final value and free scalability within the measuring range
- Configurable alarm management with adjustable response delay and alarm acknowledgement

	-1000 ... 1000 hPa	1 hPa

\* Measurement inaccuracy according to GUM.

**For differential pressure:** ±0.8% of measuring range final value ±0.3 Pa

**For humidity:** Additional humidity-dependent inaccuracy contribution +0.007 \* MW (in %RH).

**GUM** (Guide to the Expression of Uncertainty in Measurement):

ISO guideline for the determination of measurement inaccuracy, in order to make measurements comparable worldwide.

The following inaccuracies are used for the determination:

- Hysteresis
- Linearity
- Reproducibility
- Long-term stability (only for differential pressure)
- Adjustment site/factory calibration
- Test site

# Differential pressure transmitter with humidity/temperature option

The following options can be specified for the testo 6381:

<b>AXX</b>	Measuring range
<b>BXX</b>	Analog display/supply
<b>CXX</b>	Display / menu language
<b>DXX</b>	Cable input
<b>EXX</b>	Ethernet
<b>FXX</b>	Differential pressure/flow velocity unit (pre-set)
<b>GXX</b>	opt. Analog output for humidity probe connection (probe series testo 6610) units (pre-set)
<b>HXX</b>	Relay
<b>IXX</b>	Units channel 3 pre-set (only if opt. humidity probe connection available)
<b>KXX</b>	Instruction manual language

<b>AXX</b>	Measuring range
A01	0 to 10 Pa
A02	0 to 50 Pa
A03	0 to 100 Pa
A04	0 to 500 Pa
A05	0 to 10 hPa
A07	0 to 50 hPa
A08	0 to 100 hPa
A09	0 to 500 hPa
A10	0 to 1000 hPa
A21	-10 to 10 Pa
A22	-50 to 50 Pa
A23	-100 to 100 Pa
A24	-500 to 500 Pa
A25	-10 to 10 hPa
A27	-50 to 50 hPa
A28	-100 to 100 hPa
A29	-500 to 500 hPa
A30	-1000 to 1000 hPa

<b>GXX</b>	opt. Analog output for humidity probe connection (probe series testo 6610) units (pre-set)
G00	without connection possibility for humidity probe testo 6610
