## Notes

### Absolute Uncertainties

Specified at a 95 % confidence level, coverage factor k=2.

### Overrange and Function Limits

These are the minimum and maximum values for the function. Where stated, over or under these values cannot be set.

### Mathematical Functions

These functions are mathematical calculations performed by the instrument's internal processors and have been designed and validated by Time Electronics. Calibration of these functions can be performed upon request.

### Accredited Measurements

Certain functions or ranges are indicated as 'accredited measurements not available'. On an accredited calibration certificate, these measurements will be marked as 'not accredited' or will not be included. Traceable measurements can be provided upon request. For further information please contact Time Electronics.

### Power Function Information and Additional Uncertainties

Additional AC and DC current errors for use with common low terminals: 2 A Ranges: 500 ppm + 800  $\mu$ A. 22 A Range: 0.25 % + 50 mA  
Calibration is performed as separate voltage and current measurements.

### Output Resistance and Loading

The output resistance of the 20 and 200 mV ranges is 10  $\Omega$ . This must be considered when loads of 100 k $\Omega$  or less are being driven. A 100 k $\Omega$  load will result in a 0.01% error.

### Noise Information and Additional Uncertainties

Additional ACV noise floor uncertainties apply between 1 and 5 mV: 20 Hz to 20 kHz, add 20  $\mu$ V. 20 kHz to 300 kHz, add 50  $\mu$ V.  
DC specifications apply between 0.1 and 1 Hz bandwidth.

### Settling and Stabilisation

DC Current 2 A Range: Full accuracy applies after the momentary setting of full scale allowing for thermal stabilisation throughout the range. Settling time 30 seconds.

2 Wire Resistance: Specifications apply after 15 seconds of settling time. Above 1 M $\Omega$  the settling time increases to 30 seconds.

For further information about settling and stabilisation please contact Time Electronics.

Due to continuous development Time Electronics reserves the right to change specifications without prior notice.
