

# Truflo Power Supply - Wall Plug-In: 100-240 VAC -24 VDC

Truflo VDC series is a 100-240VAC 'Plug In' type power supply that transforms 100-240 VAC to 24VDC for industrial process instrumentation and control equipment. The VDC Series are made of a high impact chemical resistant thermoplastic material that makes it an excellent choice for corrosive environments. They are compact in size, cool to the touch and completely enclosed, in order to eliminate external cooling devices and prevent tampering. They are the perfect choice when power is required for low voltage DC instruments.

## Features

- Input: 100 - 240 VAC, 50/60 Hz,
- Output: 24 VDC
- Cable: 6 foot cord
- Dielectric isolation (input to output): 4 KVDC for 60 seconds
- Operating temperature: 0°C to 40°C at maximum load
- Storage temperature: -20°C to 60°C
- Over voltage and short circuit protected
- No minimum load required
- Double insulated
- Class B EMI
- EISA 2007 and CEC compliant
- Humidity: 5% to 95%, non-condensing

## Dimension
