

Truflo® — PPT Series

Digital LED Pressure Transmitter | Switch

- ✓ Highest Accuracy in the Industry | $\pm 0.25\%$
- ✓ LED Changes from Green to Red
- ✓ 330° Rotating Head | Tri-Display

- ✓ PP | PVDF | 316 SS
- ✓ IP67 | NEMA 4X
- ✓ Ceramic Sensing Diaphragm
- ✓ 4-20mA + 2 Relay Outputs (5 amp)
- ✓ Psi | Bar | KPa | Kg/cm²
- ✓ LED Changes from Green to Red in Upset Condition

Protect your equipment

The Truflo® PPT Series is the Industry's most accurate and reliable Pressure Transmitter and Switch. The PPT Series is truly unique when it comes to pressure measurement in corrosive environments.

PPT Pressure Transmitters are a one-piece design and come equipped with a bright LED display that will change from green to red in any upset condition.

The PPT is equipped with a 4-20mA output + two (5 amp) Relays. This feature is excellent for pump protection to prevent pumps from running dry.

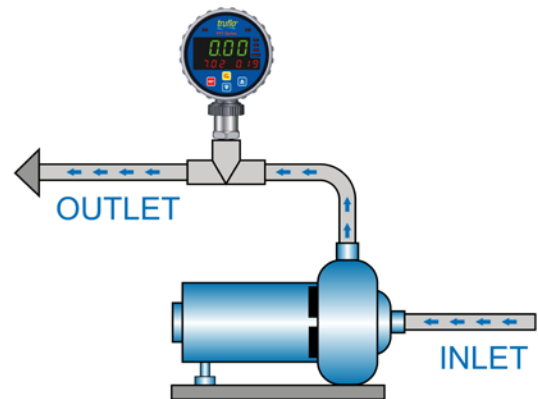

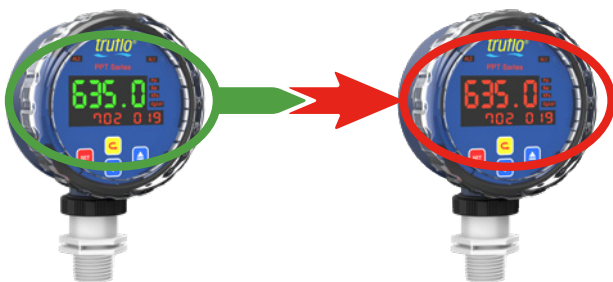

The PPT Series is available in PP, PVDF & 316 SS and equipped with either a ceramic or stainless steel sensing diaphragm.

The NEMA 4X enclosure and polycarbonate faceplate gives the PPT a rugged, industrial design that allows it to stand up to the industry's most corrosive environments.
